**Product no AS06 141**

# PC | Plastocyanin

## Product information

| | |
|---|---|
| **Immunogen** | Purified native plastocyanin from *Spinacia oleracea* UniProt: P00289 |
| **Host** | Rabbit |
| **Clonality** | Polyclonal |
| **Purity** | Serum |
| **Format** | Lyophilized |
| **Quantity** | 50 µl |
| **Reconstitution** | For reconstitution add 50 µl of sterile water |
| **Storage** | Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube. |
| **Additional information** | **Cellular [compartment marker] of chloroplast thylakoid lumen**<br><br>This product can be sold containing ProClin if requested. |

## Application information

| | |
|---|---|
| **Recommended dilution** | 1 : 100 (IG), 1 : 2000 (WB) |
| **Expected \| apparent MW** | 10 kDa |
| **Confirmed reactivity** | *Arabidops thaliana, Brassica juncea, Heliantus annuus, Hordeum vulgare, Lathyrus sativus, Nicotiana tabacum, Oryza sativa, Pisum sativum, Spinacia oleracea, Solanum tuberosum, Synechocystis sp. PCC6803, Zea mays* |
| **Predicted reactivity** | *Catalpa bungei*, Dicots, *Chlamydomonas reinhardtii, Nicotiana benthamiana, Physcomitrium patens, Ricinus communis, Solanum lycopersicum*<br><br>Species of your interest not listed? Contact us |
| **Not reactive in** | No confirmed exceptions from predicted reactivity are currently known |
| **Additional information** | Plastocyanin runs abberant due to negative charge at 12-19 kDa on SDS-PAGE depending upon the system used. in 15% gel the protein will run closer to its true MW than in 12% gel. In some cases PC can be very acidic and run at twice of its MW.<br><br>PC1 runs closer to 14 kDa while PC2 runs closer to 19 kDa. For good resolution adding fresh DTT to the sample buffer is recommended.<br>PC2 is generally more abundant and it increases with Cu feeding. PC1 is expressed first after etiolated seedlings are placed in the light. |

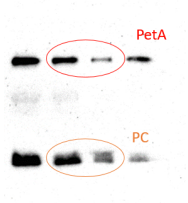
This product is **for research use only** (not for diagnostic or therapeutic use) **contact: support@agrisera.com**

Agrisera AB | Box 57 | SE-91121 Vännäs | Sweden | +46 (0)935 33 000 | www.agrisera.com

## Application example



Thylakoid membranes (10 µg of total chlorophyll) extracted freshly from *Hordeum vulgare* leaves with 100 mM HEPES-KOH (pH 7.5), 0.3 M sorbitol, 2 mM EDTA, and 1mM MgCl2 and denatured with a Laemmli buffer at 80°C for 5 min were separated on 12% SDS-PAGE and blotted 1 h to nitrocellulose (pore size of 0.2 um), using semi-dry transfer. Blot was blocked with 4% milk for 2 h/RT with agitation. Blot was incubated in the primary antibody at a dilution of 1:3000 (PC and PetA, simultaneous western blot detection for both antibodies at the same time) for 1 h/RT with agitation in PBS-T. The antibody solution was decanted and the blot was rinsed briefly, then washed 3 times for 5 min in PBS-T at RT with agitation. Blot was incubated in Agrisera matching secondary antibody (anti-rabbit IgG horse radish peroxidase conjugated) diluted to 1:25000 in for 1 h/RT with agitation. The blot was washed as above and developed for 5 min with chemiluminescent detection reagent according to manufactures recommendations. Exposure time was 30 seconds. Simultaneous western blot detection can be applied if MW of detected proteins differs in min. 20 kDa.

Courtesy Dr. Anja Liszkay, CNRS, France

**10 µg of total protein** from *Arabidopsis thaliana* **(1),** *Brassica juncea* **(2)**, *Zea mays* **(3)**, *Oryza sativa* **(4)**, *Solamum lycopersicum* **(5)**, *Nicotiana tabacum* **(6)**, *Heliantus annuus* **(7)** were separated on SDS-PAGE and blotted to **nitrocellulose**. Filters were probed with anti-PC antibody (AS06 141, **1:2000**). Signal was developed using alkaline phosphatase conjugated secondary antibody. Each sample was run in duplicate. Signal was developed using alkaline conjugated secondary antibody.

**This antibody will also work well with HRP-conjugated secondary antibodies, as AS09 602.**
