

Product no **AS15 2962****RBOHD | Respiratory burst oxidase homolog protein D****Product information**

<b>Immunogen</b>	KLH-conjugated peptide chosen from <i>Arabidopsis thaliana</i> RBOHD sequence, UniProt:Q9FLJ0, TAIR: AT5G47910
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal
<b>Purity</b>	Immunogen affinity purified serum in PBS pH 7.4.
<b>Format</b>	Lyophilized
<b>Quantity</b>	50 µg
<b>Reconstitution</b>	For reconstitution add 50 µl of sterile water
<b>Storage</b>	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

**Application information**

<b>Recommended dilution</b>	1 : 1000 (WB)
<b>Expected   apparent MW</b>	104 kDa
<b>Confirmed reactivity</b>	<i>Arabidopsis thaliana</i> , <i>Solanum</i> sp.
<b>Predicted reactivity</b>	<i>Brassica napus</i> , <i>Citrus sinensis</i> , <i>Citrullus colocynthis</i> , <i>Cucumis melo</i> , <i>Fragaria ananassa</i> , <i>Gossypium arboreum</i> , <i>Hordeum vulgare</i> , <i>Manihot esculenta</i> , <i>Morus notabilis</i> , <i>Nicotiana tabacum</i> , <i>Oryza sativa</i> , <i>Picea abies</i> , <i>Ricinus communis</i> , <i>Sinensis osbeck</i> , <i>Solanum tuberosum</i> , <i>Theobroma cacao</i> , <i>Triticum aestivum</i> , <i>Zea mays</i> , <i>Zostera marina</i> Species of your interest not listed? <a href="#">Contact us</a>
<b>Not reactive in</b>	<i>Marchantia polymorpha</i> , <i>Medicago sativa</i>
<b>Additional information</b>	For solubilization we recommend 65°C for 5 min, Sample boiling is not recommended

**Application example**

Total proteins were isolated from 10 or 12 seedlings of 7-day-old *Arabidopsis thaliana* seedlings of Col-0 (wild-type) and *rbohD* null mutant (Nühse et al., 2007). 16 µl of total proteins were denatured at 65°C for 5 min, separated on an 8 % SDS-PAGE, and transferred for 70 min at 55V using a tank transfer system to nitrocellulose membrane. Blots were blocked with 1xPBS+0.1% Tween 20 + 5 % milk (PBS-T) or TBS + 0.1 % Tween 20 (TBS-T) + 5 % milk for 2 h at room temperature (RT) with agitation. Primary antibodies were diluted as indicated to 1: 2,500 and 1: 5,000 respectively and incubated ON at 4°C with agitation in 1xPBS-T or TBS-T + 5 % milk. The primary antibody solutions were decanted, and the blots

were washed 3 times (7 min. each) in 1xPBS-T or TBS-T at RT with agitation. Blot was incubated with secondary antibody goat anti-rabbit HRP conjugated ([AS09 602](#), Agrisera) diluted to 1: 20, 000 and developed with chemiluminescent detection reagent, according to manufacture's recommendations. Exposure time was 2 min. for X-ray film. As a control part of the same membrane was incubated with anti-CNX1/2 antibodies ([AS12 2365](#), Agrisera).
